Project: New England Studios Design & Certification
Client: MJM Development

Services Provided:

- Conducted site background noise survey before construction.
- Performed environmental noise evaluation using Cadna/A; all rooftop equipment was modeled for noise emissions to demonstrate compliance with the Devens Enterprise Commission (DEC) noise requirements.
- Prepared post-construction noise survey evaluation protocols which were reviewed and approved by the DEC. Noise evaluations were then performed at all surrounding abutter locations.
- Certified interior studio noise levels to range of NC-18 and better.

Results:

- Completion of state-of-the-art sound studio in Devens, Massachusetts which meets all local environmental standards and has interior performance certified by NCE to NC-18 or better.
